Contacts

Contacts are an organisation's social network. Kolab provides the tools to collect, organise and share contact information efficiently.

Email

Kolab allows businesses to handle their email fast and efficiently at any scale.

Files

Save and share files from wherever you are with Kolab's integrated file cloud service.

Secure

All applications are hosted in a safe and secure environment. Kolab has been engineered with security and reliability at the core.

Calendar

Ensure that even the busiest people in your organisation retain full control over their agendas with ease.

Tasks & Notes

Maintain an overview of tasks to significantly improve both individual and team workflow.

Sharing

With its focus on being a collaboration platform, Kolab excels at helping people share goals and information with each other across the world.

Transparency? Trust?

boingboing / DAMIEN ZAMMIT / 5 AM WED, JUN 15 2016

Intel x86s hide another CPU that can take over your machine (you can't audit it)

Recent Intel x86 processors implement a secret, powerful control mechanism that runs on a separate chip that no one is allowed to audit or examine. When these are eventually compromised, they'll expose all affected systems to nearly unkillable, undetectable rootkit attacks.

Download our Latest Standard

OpenCAPI sets a new standard for the industry, providing a high bandwidth, low latency open interface design specification.

These specifications were contributed to the OpenCAPI Consortium pursuant of the IPR Policy as input specifications and will be reviewed and updated appropriately following the work group process.

The OpenCAPI consortium looks forward to publishing draft specifications when this process completes.
